Market Pulse

A simple guide to the game

How to run the game

1 Install Python (once)

Install Python 3.10 or newer from python.org. During setup, tick Add python.exe to PATH.

2 Prepare the game (once)

Open the market_pulse folder. Type cmd in the address bar at the top of the window and press Enter. Then run these two commands, one at a time:

```
python -m venv .venv
```

```
.venv\Scripts\python -m pip install -r requirements.txt
```

3 Try it with the mouse

No wall or sensor needed. Each mouse click counts as one ball:

```
.venv\Scripts\python main.py --windowed --simulate
```

4 Run it on the wall

The game opens full screen and reads ball hits from the sensor. Or double-click scripts\run_kiosk.bat.

```
.venv\Scripts\python main.py
```

Operator keys

Space	Start a round or skip the instructions
Enter	Confirm the name and start the game
P	Pause and resume
R	Cancel the round and go back to the start screen
F4	Cancel registration
Esc Esc	Quit (press twice)

Balls not registering on the wall? Press F3 to see the sensor status.

Market Pulse

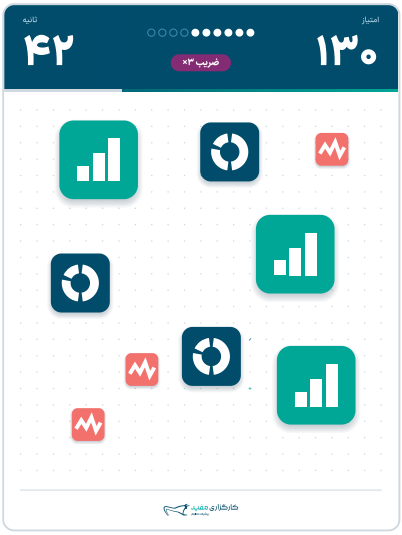

A simple guide to the game

The rules

Throw balls at the coloured boxes and score as many points as you can.

10	60	4
touches	seconds	seconds of Market Rush

Throw a ball at the «شروع» (Start) square, type your name on the keyboard, then press Start Game.

The three boxes

رشد · Growth

Low risk, low return

10

points

تنوع سبد · Balanced portfolio

Medium risk and return

15

points

نوسان · Volatility

High risk, high possible return

30

points

After every hit	All the boxes move to new places.
Red box	Every time: adds three new boxes and starts Market Rush.
Market Rush	4 seconds with faster movement, more boxes and ×2 points. Another red hit gives a fresh 4 seconds.
Hits in a row	The multiplier becomes ×2 after 2 hits, ×3 after 4 hits and ×4 after 6 hits.
A miss	You lose no points, but it uses a touch and the multiplier goes back to ×1.
End of the game	On the 10th touch or after 60 seconds, whichever comes first.
